PROFESSIONAL SUMMARY

Full-Stack & Mobile Developer with hands-on experience building scalable, production-ready applications using Laravel, React.js, and React Native. Proven ability to deliver end-to-end solutions — from designing RESTful APIs and managing databases to crafting responsive, user-centric interfaces and publishing mobile apps. Known for writing clean, maintainable code and collaborating effectively with cross-functional teams to turn client requirements into high-impact digital products.

TECHNICAL SKILLS

Front-End Development

- JavaScript / TypeScript
- React.js & Next.js
- React Native (Cross-Platform Mobile)
- Redux Toolkit & React Query
- Tailwind CSS & Material-UI (MUI)
- Responsive & RTL-Ready UI Design

Back-End & Tools

- Laravel (PHP)
- RESTful API Design & Integration
- MySQL Database Management
- Authentication & Role-Based Access
- Git / GitHub / GitLab
- PDF Generation & Financial Reports

WORK EXPERIENCE

Full-Stack Developer | BandTech Software Company — *2022 – Present*

- Built modern, responsive web interfaces using React.js and Next.js, with a focus on performance and UX.
- Designed and developed scalable RESTful APIs and database-driven backends with Laravel and MySQL.
- Delivered complete full-stack projects for real clients, owning both front-end and back-end development.
- Developed and published cross-platform mobile applications using React Native (including Google Play releases).
- Implemented advanced features: GPS mapping, real-time API integration, PDF financial reports, and role-based admin panels.
- Collaborated with the team in Agile-style planning, estimation, and delivery.

IT Support Specialist | First Processor Company — *2021 – 2022*

- Provided hardware and software technical support, handling installation, configuration, and troubleshooting.
- Resolved critical issues for accounting and inventory teams, minimizing downtime.
- Performed system upgrades and maintenance to ensure operational stability.

EDUCATION

Bachelor of Science in Information Technology — *Jan 2020 – Jan 2024*

Middle Technical University, Baghdad, Iraq

KEY PROJECTS

Shashaty — Mobile Accessories E-Commerce App

Full-featured mobile e-commerce platform (React Native) with customer accounts, guest mode, ads system, push notifications, employee roles, and a comprehensive admin panel.

Victoria — Furniture Store E-Commerce App

Complete e-commerce solution for furniture products featuring a product catalog, order management, sales analytics dashboard, and inventory control. Android app published on Google Play.

Mada Al-Afkar — Admin Dashboard (Front-End)

High-performance admin dashboard with real-time API integration, GPS mapping, smart product management, full RTL Arabic support, and automated PDF financial reporting.

Al-Andalus Car Insurance — Management Dashboard

Advanced insurance management system with role-based access control, financial analytics, policy tracking, and detailed reporting tools.

AllwisamExpress — Bilingual Landing Page *View Live Demo*

Freelance bilingual landing page (Arabic & English) built with React, TypeScript, and Material-UI. Features smooth transitions, RTL/LTR switching, and a fully responsive layout.

PROFESSIONAL DEVELOPMENT

Laracasts Platform *(Jan 2025 – Present)*

- Next.js: Server-Side Rendering (SSR), Static Site Generation (SSG), API routes, dynamic routing, and performance optimization.
- Laravel API: RESTful API architecture, database design, authentication (Sanctum/Passport), security hardening, and query optimization.
